ABOUT PLANETCOMNET

Founded in 2004 to meet the ever-increasing demand for modern data centers & network infrastructure compliant with the highest quality standards, PCTL (PLANETCOMNET TECHNOLOGIES Limited.) started out by developing campus concepts for high-availability IT environments. PCTL's facility in Noida is not only the company headquarters, but also hosts a NOC to provide enhanced in-house services to customers. To effectively manage and maintain our customers and suppliers we utilize best-in-class ERP for efficiency and reporting, in line to our mission:

PCTL is a **remote infrastructure solutions provider**, an **ISO 9001:2000 & 14001:2004** certified company. Our service architects are completely equipped with strong and competent technical knowledge to attend the customers throughout the nation. Working on "BOTH" model of development, operation (testing / dry run) and handling data centers.

We plan, construct, operate and secure such centers - on our customers' premises. As a leading provider of secure data centre environments and network infrastructure providers, we specialize in guaranteeing the highest levels of physical security and operational availability for hosting IT and network systems.

Managing Risks / Service Offering

Our business is to make risks manageable by combining specialized technical expertise with the latest security and building technology. High-availability data centre infrastructures demand the utmost reliability and security. PCTL bundles all these services to provide one-stop shopping for planning, construction, operation and security services. Our customized range of services is tailored to businesses that demand the most stringent IT hosting requirements in terms of security and availability.

Apart from data centre services, we also provide services such as:

- **Physical Network and Infrastructure Solution**
- **IT Consulting, Design, Integration and Support**
- **UPS & Back Up Power Generators**
- **Building Automation solutions.**
- **Network Security Solutions**
- **Storage Solutions**
- **Audit Services of Physical Networks & Wi Fi Networks**

Focus on Performance

As a provider of high-availability infrastructures our business is the professional handling of performance. We leverage the advantages of scaling technical performance and specifically apply our expertise and abilities to reliably managing risks. Sustained success is only ensured if our work benefits our customers as well as ourselves. Our business activities are therefore based on a set of principles designed to fulfill these goals.

Focus on the individual requirements of our customers

Quality: we offer our customers tailor-made individual solutions that meet the highest quality standards.

Flexibility: a lean management structure and optimized processes enable us to react rapidly and effectively to changes in the technical environment and give us the flexibility to Implement the wishes of our customers.

Leveraging our technical knowledge and experience to Find the best possible solutions.

Professional expertise and experience: our experts use their extensive knowledge and many years of experience to deal with even the most difficult tasks and develop effective solutions

Pronounced performance-based culture: At PCTL we achieve the highest levels of performance by setting our staff clear targets, learning from our mistakes, and rewarding success.

Concentrating our resources to achieve sustained and Profitable growth.

We concentrate on delivering profitable services that offer our customers long-term security and form the basis for internal decision-making processes. Our efficient

Organizational structure and processes are also designed to support sustainability.

Physical Network and Infrastructure Solution

PCTL is a leading structured premise network cabling designer and installer in India. Our extensive engineering and technical background, combined with years of experience, allows us to provide our clients with an unsurpassed level of service and support.

- **Site Surveys, Design and Engineering**
- **Cabling Maintenance**
- **Turnkey Structured Wiring Installation**
- **Cabling/Network Troubleshooting**
- **Project Management & Planning**
- **Cabling System Testing**
- **CAD Documentation**
- **Cabling System Certification**

Our experienced project managers utilize the latest project management techniques developed by PCTL and work closely with our clients to ensure projects are completed on time and within budget. Each cabling installation is tested and certified by trained quality-assurance engineers and technicians. Final test results are documented and submitted to clients after project completion. An on-going comprehensive training program provided by leading data communication equipment manufacturers and leading industry organizations ensures that our staff is current in the latest technology and services. PCTL offers a menu of services and we are experienced in various cabling systems including and not limited to:

- **inside/Outside Plant**
- **Data Centre Build-out**
- **Horizontal, Riser, Backbone**
- **CAT3, CAT5E, CAT6, CAT6E, Coax**
- **Voice/Data/CATV**
- **Fiber Optics**

IT Consulting, Design, Integration and Support

PCTL is the industry leader in meeting the ever-changing demand for information technology and network infrastructure services.

- **Data Center Consulting**
- **Network/System Study and Analysis**
- **Network and System Integration**
- **Technical Requirements Development**
- **IP Telephony/Convergence Technologies**
- **Network Management/Administration**
- **IT Security Assessment and Audit**
- **Network/System Baselineing**
- **Project Management**
- **Network/System Troubleshooting**
- **Network/Security Operation Center**
- **On-site Technical Services**
- **Remote Network Management**

PCTL has developed strong strategic alliances with various industry leaders. These alliances provide PCTL with access to existing and emerging technologies, and related training resources to ensure that we have the technical depth needed to deliver quality solutions. We have the capability and expertise to design, plan and implement small to large size information technology solutions.

We focus on the long-term benefits and value to our clients. We structure our engagements so that we work closely with our clients to ensure knowledge transfer, and empower them to successfully manage operations and maintain the systems upon the conclusion of the engagement.

Our LAN/WAN expertise, combined with our extensive business background, allows us to build, add, move, or migrate your existing network infrastructure to one which is more robust, modern and technologically advanced, with minimal downtime, cost and disruption of productivity.

PCTL security experts can provide detailed recommendations after performing security assessment and vulnerability scans against your company's internal network as well as public facing systems that can be potential hacking targets from the Internet for which we provide auditing services.

UPS AND BACKUP POWER

PCTL is in the business of helping customers to achieve their objectives by providing products and services that assure the continuity and quality of power for critical information systems and key processes.

PCTL offers the broadest range of solutions in the industry, from surge protection and power conditioning to Uninterruptible Power Supplies in off-line, on-line and line interactive topologies, backup power generators, software, communications and remote monitoring. We believe that collaborating with our customers to improve how we service and support our solutions and services is the only way to maintain our world-class standards

- **Backup power System Design**
- **Backup Power Audit & Assessment**
- **Preventative Maintenance**
- **Remote Monitoring**
- **On-Site Maintenance Contract**
- **Installation and Service**
- **24-hour, 7 Day-A-Week Support**
- **Relocation**

We concentrate on the reliability and cost effectiveness of your power backup system to keep your mission-critical information technology systems up and running efficiently. Our team is able to maximize the reliability and uptime of your computing infrastructure by analyzing and assessing your unique computing needs. We design power backup systems and make recommendations based on industry proven solutions and standards and maximize our clients return on investment.

- **Line Interactive UPS**
- **On-line UPS**
- **Off-line UPS**
- **Backup Generators**
- **Power Distribution Units**
- **Parallel Redundant UPS**
- **Standby Protection Systems**
- **Remote Power Backup Monitoring**

Our extensive background and experience with the requirements of Information Technology centers and technology driven business allows us to design, install and maintain reliable power backup systems that will keep your company at the forefront for today's highly competitive marketplace.

Security - Building Automation

PCTL security provides integrated security services for monitoring the security and Operation of buildings and their technical infrastructures. Integration of modern video and communication technology makes it possible to not only monitor complex and fault- critical building management systems across India, but also remotely control access Systems and installations. If required, appropriate intervention measures can also be initiated. This facilitates round-the-clock supervision of technical building infrastructures and access Control systems within the customer's facility and other data centers.

We provide solutions across:-

- Fire Alarm Systems
- CC TV Systems
- Fire Suppression Systems
- Access Control Systems
- Rodent Repellent
- PA Systems
- VESDA etc,

Scalability

Scalability, which means the ability to quickly adjust floor space, performance capability and provided services to meet future requirements, is indispensable in modern operations. PCTL's data centers / network solution is therefore designed to provide maximum flexibility. Specifications of data centre space are tailored to meet individual performance requirements. Just as quickly we provide design additional infrastructure, increased technical performance, and customized service packages.

PCTL builds data centers, storage facilities and office units from raw floor space in accordance with your specific requirements.

Depending on the portfolio of data centre / NOC space offered by client to PCTL we design from small rack spaces for collocation applications to separate medium- sized compartments secured by steel cages and fully customized data centre units.

Apart from these services, numerous other options are also available, such as construction, architecture, MAC services, supplementary security equipment and climate control performance. The infrastructure can thus be adapted to meet your individual requirements at any time.

As mentioned, PCTL provides End-to-End Structured Cabling Solutions for Copper and Fiber Products and End-to-End voice solutions and also active / switching & routing solution.

With ever growing importance for data, PCTL provides solutions based on need of the client, we ensure that data is Stored / Archived or Retrievable /Available etc. In forms of NAS, Tape Drives / Libraries (including VTL), SAN, Software.

Service of the Highest Quality

Operational processes must be optimized to provide our customers with a balance between security and cost benefits. For this reason, PCTL security has developed an operational concept based on a detailed technical facility management system supported by state-of-the-art building management and control technology. The experience and expertise that PCTL has acquired in developing this concept is also offered as a service for planning, constructing and operating other high-availability data centers.

Planning and construction of high-availability data centers

PCTL can assist you in planning and building your high-availability data center. We will develop a professional concept for your business, regardless of whether you are integrating a single server room into your building or planning the construction of your own data centre. PCTL will act as a general contractor to provide flexible solutions meeting the highest quality standards.

Facility management of the highest standard

PCTL can also act as a service provider for all key technical and infrastructure-related facility management tasks in high-availability data centers. Our operational concept integrates modern building technology and control technology with technical facility management to ensure uninterrupted operation of fault-critical supply systems. Our specialists at PCTL facility services -building technicians, electricians, climate control technicians and engineers - ensure that the best possible environment for your IT infrastructure is provided at all times

Tailored Services, the services offered by

PCTL are also at your disposal during the project implementation and operational phases when you make customized extensions to your own data centre. In this case, PCTL can offer a range of services you can draw on according to your individual needs, such as supplementary electrical installations, passive network cabling, and rack assembly

Service of the Highest Quality

PCTL offers comprehensive network audit in Physical layer, Network Layer and Wi Fi in accordance with your specific requirements.

Proactively, we have procured best in industry Tools & Testing. Equipment at our offices such as:-
Cable Test Meter, a Complete Fiber Termination Kit, Air – Blown Fiber Termination / Blowing Machine, Pair Crimping Tool, Fiber Power Meter, Fiber Splicer.

With number of threats be it viruses, spam mails, intrusions, hacks unproductive websites, harming or phishing, PCTL with our strategic partners provide Firewalls.

- **UTM Firewalls**
- **Anti Virus Solutions**
- **Anti Spam Solutions**
- **IPS**
- **URL filtering**

Service of the Highest Quality

PCTL has catered to several offices of the Government /Public Sector including very critical network infrastructure based offices.

In the hospitality industry, PCTL has catered to most leading brands and facilities in Network Infrastructure including Wi – Fi facility in multiple areas of a facility.

Education campus, PCTL has been engaged in few of the biggest campus infrastructure building across the nation, although the most challenging, PCTL has always given importance to this area as “we build the nation’s future.

IT Campus, with increasing number of IT companies in India, PCTL has catered to most Top 100 Fortune companies in the world.

Furthermore, PCTL has catered to:-

- **Trade & Industry**
- **Financial Services**
- **Automobile Industry**
- **Hospitals**
